## GOLD RUSH BREAKS \$US500

*Extracted from article in business section of Gold Coast Bulletin, Wednesday 30/11/05*

The gold price marched past \$US500 an ounce yesterday and with global investment funds gripped by gold fever, analysts believe it will continue to rise.

CommSec commodities analyst David Thurtell said gold was now at its highest level since 1987 and he expected it to keep going up for some time yet.

Mr Thurtell said he expected the gold price could reach \$US550 in the first six months of 2006 before easing back to about \$US475 by the end of the year.

We sell a wide range of solders, stock gauge and alloys, please call us to place an order
