

Outdoor Bark Control PBC00-11216

Love thy neighbour by stopping his dog from barking

If your neighbour's dog is driving you crazy with his barking, help is here!

Our ultrasound outdoor bark control unit looks like an ordinary birdhouse that can hang in a tree, on a fence post or anywhere outside. It can detect barking from up to 50 feet (15 metres) away and has 3 range settings.

Whenever a dog barks he will hear a safe, high pitched sound (inaudible to humans) that will teach him to stop his annoying habit.

FEATURES

- Maximum range: Up to 50 feet
- 4 levels of operation including a test mode
- Durable and weatherproof
- Two colour LED for good/low battery indication
- Uses a 9 volt alkaline battery

"I am a Chihuahua breeder and we have about 15 dogs. We live in a suburban block and the dogs have been barking and fighting non stop, even throughout the night. They bark so much that our neighbours rarely go to their backyard, which is something we have been very unhappy about. I very recently bought the Outdoor Bark Control unit through Innotek and I must say that I am EXTREMELY IMPRESSED! The dogs have not been barking nor fighting and it is a great relief for everyone concerned. I just wanted to say thank you very much for a fantastic product.

Suranga Perera, Melbourne (September 2008)
